

3/2 diaphragm valve

Symbol

On the kit

What it does

Low-pressure air at port 12 pushes the diaphragm. Air flows from port 1 to port 2.

It can sense an **air bleed**. Cover the open pipe and the valve works.

Key words

3/2 valve

A valve with 3 ports and 2 positions.

Actuator

The part that works the valve.

Signal

Air sent to make the next part work.

Pneumatic

Worked by air.

Diaphragm

A rubber disc. Air pushes it to work the valve.

Air bleed

An open pipe. Cover it and the valve works.
