

Single-acting cylinder

Symbol

On the kit

What it does

Air in: air pushes the piston. The piston rod moves out. This is the **outstroke**.

Air out: the spring pushes the piston back. This is the **instroke**.

Key words

Single-acting

Air pushes the piston one way only.

Piston

The disc that air pushes along the cylinder.

Outstroke

The piston rod moves out.

Instroke

The piston rod moves back in.
